Finland energy conservation

What is Finland's Energy and Climate Plan Update?

Finland's Energy and Climate Plan Update outlines the impact of the confirmed policy measures on the projected development of greenhouse gas emissions, renewable energy and energy efficiency until 2040.

When did Finland adopt the National Climate and energy strategy?

The Government adopted the National Climate and Energy Strategy on 30 June 2022. The Strategy outlines measures by which Finland will meet its EU climate commitments for 2030 and will become carbon neutral by 2035. The Medium-term Climate Change Policy Plan

What are Finland's Energy and climate policies?

Finland's energy and climate policies have been centred on ensuring energy security, reducing energy import dependency, promoting a sustainable economy and protecting biodiversity. Promoting energy markets and market-based instruments, such as EU emissions trading, are important parts of the overall strategy.

Are Finland's forests a good source of energy?

Finland's forests,which historically offset significant greenhouse gas emissions,have become a net emissions source. A continued push towards the energy transition is needed,as imported fossil fuels still account for over one-third of energy supply and cover higher shares in transport and key industries.

Finland"s forests, which historically offset significant greenhouse gas emissions, have become a net emissions source. A continued push towards the energy transition is needed, as ...
