

Albania's Ministry of Infrastructure and Energy has received four applications for solar projects with a total installed capacity of 235 MW. The projects are planned to be built in the ...

The Ministry of Infrastructure and Energy of Albania received four applications for solar power projects with a combined capacity of 235 MW. A proposed unit in Fier, the country's ...

Albania's government has given the go-ahead for two new solar farms, together totalling 54 MW, as it accelerates its shift toward clean energy. Under the Council of Ministers' approval, both ...

Albania's Council of Ministers has approved the development of two solar parks to advance the country's renewable energy goals. The projects, located in different regions, will be ...

As a country situated in a region with abundant solar resources, Albania has enormous potential for using solar energy through photovoltaic (PV) systems. With the energy crisis repeating ...

The strategic shift to solar power is essential for creating a more resilient and diversified energy mix. Currently, Albania's total installed solar capacity is approximately 80 MW. The new ...

On May 6, 2025, the Albanian government approved the development of two new solar power plants, totaling 54 megawatts (MW) in capacity.

Five utility-scale solar photovoltaic parks with a combined installed capacity of 156 MW were commissioned in Albania in 2025. The largest of these, Sunny Side Solar (100 MW), was ...

A ceremony took place in Albania, 22 July 2025, to sign the agreement to build a new solar photovoltaic power plant at Belshi. The EUR42 million project is co-financed by an EU contribution ...

Solar power accounts for 6% of electricity production in Albania. More than half of the photovoltaic output is from the Karavasta facility, the biggest of its kind in the Western Balkans.
