

Investment opportunities in Argentina's phase change immersed liquid cooling system market are abundant, especially in expanding data center infrastructure and green technology...

The international tender, first announced in February, aimed to secure 500 MW of energy storage capacity for critical points in the Buenos Aires Metropolitan Area (AMBA) grid. In a strong ...

Interested parties are being invited to propose projects encompassing the financing, construction and management of energy storage systems in the wholesale electricity market.

The AlmaGBA tender not only signals growing investor confidence in Argentina's energy transition but also sets the stage for grid resilience and renewable integration.

One of the main challenges facing the Argentina Energy Storage System market is the high cost of energy storage systems. Although the cost of energy storage systems has been ...

As the demand for data centers and high-performance computing continues to grow in Argentina, there are ample opportunities for companies operating in the immersion cooling market to capitalize on this ...

In a strong show of interest, 15 companies submitted 27 different project proposals. These represent a combined investment commitment of over \$1 billion and a total of 1,347 MW of power, ...

The Alma-GBA storage tender saw 15 companies submit 27 projects for 1,347 MW of capacity. It was the high private sector interest and competitive bids that resulted in raising the ...

The rise of edge computing and the deployment of large-scale battery energy storage systems are further propelling the demand for advanced cooling solutions, such as immersion liquid ...

When exploring the immersion cooling industry in Argentina, several key considerations should be taken into account. First, the regulatory landscape is crucial, as local laws may affect the implementation ...
