"By 2035, in just over 10 years, we want to generate 25% of Berlin's electricity from sunlight. To achieve this, we must install large, high-performance systems on roofs."

We provide a comprehensive range of photovoltaic installation services to cater to residential and commercial needs. Tailored solutions that align with your energy needs and sustainability goals. Free ...

To optimize solar energy production at this location, it is recommended to tilt the panels at an angle of 44 degrees facing south. This will ensure maximum exposure to sunlight throughout the year and ...

Here you can peruse detailed information on the long-term potential of solar energy use in Berlin. Discover also where existing solar-thermal and photovoltaic systems are located and how they are ...

In recent years, ondulators and photovoltaic panels at Rathbone New Berlin village and Tyre (NY) have gained popularity. They use an inverter photovoltaic to convert solar current into usable energy.

We plan, build and operate photovoltaic installations for the generation of environmentally friendly solar power. To do this, we rent suitable roof space from building owners for a period of around 20 years.

Berlin introduced the solar mandate to unlock the city's rooftop solar potential and contribute to climate goals. Since 1 January 2023, new buildings and major roof renovations on ...
