

We provide you with regularly updated news and publications on solar power in Brazil - the country with one of the greatest solar energy potential in the world due to high level of insolation. ...

The company revealed the launch of its new solar panel developed in Brazilian territory. The initiative represents not only a technological advance, but also a milestone for the renewable energy industry ...

These records highlight the growing importance of solar energy in Brazil's energy landscape and its potential to soon become a major force in the country's energy transition.

(Belgium, Brazil / Oslo, Norway - 11 November, 2025) - Statkraft, Europe's largest producer of renewable energy, inaugurates new solar farms and batteries at the climate summit ...

In 2016, a factory capable of producing 400 MW of solar panels a year opened in Sorocaba in S&#227;o Paulo, owned by Canadian Solar. A plan to build a solar panel factory in Rio Grande do Norte was ...

Brazil installed a record 18.9 GW of new solar capacity last year.

Brazil has achieved a historic milestone in its energy transition, with wind and solar power accounting for more than one-third of the nation's total electricity generation for the first time in ...

Brazil is advancing its solar energy production by launching the first photovoltaic module factory in Caetit&#233;, Bahia. This initiative, led by Casa dos Ventos, is part of a larger project integrating ...

Brazil accounts for only 27% of solar capacity that is currently operating or under construction in Latin America, but 65% of the capacity in the pre-construction phase, and so is home ...

Solar energy in Brazil surpassed the 55 GW milestone in March 2025, more than doubling its photovoltaic (PV) count in the last few years. That breakneck expansion is reshaping Brazil's energy ...
