

BYD Battery-Box is a leading energy storage solution from BYD, a global pioneer in clean energy and electric mobility. Designed to integrate seamlessly with solar systems, the Battery-Box series utilizes ...

We maintain a robust stock of BYD batteries, ranging in size from 12 kWh to 32 kWh of storage. Whether you're installing solar batteries for emergency backup purposes or as a whole-system ...

BYD is the world's leading producer of rechargeable batteries: NiMH batteries, Lithium-ion batteries and NCM batteries. BYD owns the complete supply chain layout from mineral battery cells to battery packs.

BYD Batteries have a 10-year track record and millions of on-road miles. That means BYD batteries are built to last up to 30 years of life, 20 to 25 years of warranty on eligible storage projects.

The BYD Battery-Box is a lithium battery with battery control unit (BCU) for usage with an external inverter. The flexible battery system provides maximum safety, lifetime and performance, which ...

BYD is recognized as the global leading manufacturer of Lithium- Ion batteries. mpletely integrated supply chain from mineral resources through to recycling. Our cell production capacity has reached ...

General materials and documents for the Battery-Box can be downloaded here. For further material also visit the webpage of our official local service partners which can be found under Contact.

The Battery-Max Lite is designed to be „the" battery in your energy system. By pairing with top-tier external inverters and ofering an open interface for easy system integration, the Battery-Max Lite ...

A: 2.97kWh is the initial capacity (designed) of the Energy Storage Module. B: The actual capacity is affected by the external environment (such as temperature, transportation, and storage).

Visit the BYD Energia Download Center and download catalogs, technical manuals, certificates, installation guides and other useful materials.
