

# Can I pay for photovoltaic panels in installments

How does solar panel financing work?

A unique option for solar panel financing is a solar lease or power purchase agreement (PPA). With both a lease or a PPA, a company installs the solar system on your roof, and you pay that company for your energy each month, which is typically 10% to 30% lower than your usual electric bill.

Should you pay cash for solar panels?

Paying cash for solar panels is an excellent idea for people with a good deal of savings who pay a fairly large federal tax every year. They can claim 30% of the costs to install solar panels on their next year's tax return and start recouping the cost of their solar investment using energy bill savings from day one.

How do I pay for a solar system?

Fortunately, there are tax incentives as well as financing options that make paying for a solar system a lot more manageable. Solar financing involves using instruments, like loans and leases, to pay for a solar system in installments over time rather than in one lump sum at the time of purchase.

How much do solar panels cost?

The average solar panel installation will work out to about \$3 per watt. Many factors will impact a system's cost, like the size, equipment used, and installer. No matter how you cut it, solar is a high-priced investment. Luckily, you can finance a solar installation in several ways.
