

Drawing on recent auction results from Saudi Arabia, India and Italy, along with in-depth interviews with project developers, suppliers and analysts across global markets, it captures the most ...

China lithium battery solar container power station factory is running Baochi Energy Storage Station, China's first large-scale lithium-sodium hybrid energy storage station, starts operations in Southwest ...

Carbon Brief explores how China has been driving the energy storage sector forwards and how it fits into the nation's wider energy transition.

China and European solar and storage leaders met in Düsseldorf, Germany, this week to call for deeper cross-border cooperation as both regions confront record PV additions, rising storage...

Based on a brief analysis of the global and Chinese energy storage markets in terms of size and future development, the publication delves into the relevant business models and cases of new energy ...

Ahead and heading into a new era for new energy, it is expected that China's energy storage capacity and its BESS capacity in particular will grow at a CAGR rate of 44% between 2023 and 2027.

As Europe races to achieve 55% emission reduction by 2030 and China targets 1,200 GW renewable capacity, power storage equipment has become the linchpin of this energy revolution.

At the heart of this transformation lies the MEOX Mobile Solar Container, a CE-certified and IP65-rated system built to withstand dust, water, Level 8 winds, and even magnitude 8 ...

State-of-the-art prismatic lithium battery cells from Samsung SDI combined with our patented and TÜV-certified Active Battery Optimizer smart cell control system form the core of our storage ...

China's Sinopec and Denmark's Everfuel recently unveiled a hydrogen storage system that can power a mid-sized city for 72 hours using nothing but seawater and surplus wind energy.
