

As we count down to the Solar World Congress 2025 in Fortaleza, let's dive into Brazil's solar energy history. Fifteen years ago, no one could have imagined that Brazil would become one of ...

Solar energy in Brazil surpassed the 55 GW milestone in March 2025, more than doubling its photovoltaic (PV) count in the last few years. That breakneck expansion is reshaping Brazil's energy ...

In 2021, a number of photovoltaic and financial solutions companies expanded their work in Brazil. Companies such as Absolar, Insole, Trina Solar, Alexandria, and Evolua Energia saw significant growth. In addition, traditional energy companies such as Shell and Norway's Equinor began to get involved. "When we arrived in the country, the market was relatively small and now it's one of the biggest ones in the world," says Ivano Garcia-Maltrás, vice president of Trina Solar in the Caribbean and Latin America, sa...

In summary, the milestone of 3 million distributed solar generation installations in Brazil highlights the success of incentive policies and the growing awareness of the importance of ...

In Brazil, solar photovoltaic dominates the distributed generation sector, representing 99% of the country's total distributed generation capacity. Small hydroelectric and wind account for ...

In 2020, the country's installed solar PV capacity stood at 8.5 gigawatts. By the end of 2024, this had grown to roughly 53 gigawatts. The Brazilian solar sector is experiencing a rapid...

One of the most important regulatory issues in Brazil's 2025 Agenda is the restriction of solar and wind plant energy due to the lack of capacity of the transmission systems and the supply of ...

Brazil is expected to add 13.2 GW of solar capacity in 2025, but the market is showing early signs of slowing as new large-scale projects face delays and distributed generation encounters...

In 2021, a number of photovoltaic and financial solutions companies expanded their work in Brazil. Companies such as Absolar, Insole, Trina Solar, Alexandria, and Evolua Energia saw significant ...

Between 2014 and 2022, 194 solar energy projects were successful in these auctions, providing data that allows us to analyze the evolution of solar photovoltaic utility-scale energy ...

In 2024, solar power, when including distributed generation, became the second largest source of electricity in Brazil, surpassing wind power, and reaching almost 50 GW. Utility scale solar ...
