

A horse-drawn carriage passes a photovoltaic park in Yaguaramas, Cienfuegos Province, Cuba, where hundreds of workers are hastily installing 44,000 solar panels.

This study aims to develop a comprehensive framework for optimal solar photovoltaic deployment in Cuba that balances technical feasibility, economic viability, and geographic equity ...

"There are 26 photovoltaic solar parks that are currently in different phases of construction in all the provinces, which means an enormous constructive effort for the country", ...

Cuba launches new solar parks aiming for 2,000 MW by 2028, tackling energy crisis with Chinese-backed tech and renewable energy investments.

Cuba is significantly expanding its solar energy capacity in a race against time, yet the country is projected to fall drastically short of its energy needs, facing a potential grid collapse by 2025.

Chinese and Cuban authorities signed an investment agreement to jointly implement a project to expand the use of renewable energy. In the short term, the investment project consists of ...

In a nation with plentiful sunshine, Cuban officials have long had the opportunity to encourage solar power as one solution to national energy problems. But October's sweeping outages -- the island's ...

In an attempt to mask its ongoing energy troubles, the Cuban regime is pushing solar energy as a solution, now introducing "solar stations" to recharge electric tricycles, scooters, and ...

Cuba is investing in solar energy and battery storage to address its severe energy crisis, reduce dependency on fossil fuels, and improve the reliability and stability of its power supply.

In February 2025, just before the inauguration of the Cotorro solar park, the country experienced blackouts that affected more than 56% of the island at once, forcing authorities to ...
