

In July 2021, President Higgins signed Ireland's Climate Action and Low Carbon Development (Amendment) Bill 2021. This bill enshrined into law, a 51% emission-reduction target for 2030 and a ...

To understand Dublin's approach to energy, we need to delve into the various solutions the city has adopted. From the implementation of renewable energy sources to investment in energy ...

Under the Government's Climate Action Plan, 80pc of Ireland's electricity must come from renewable sources. To make that happen, there is a need to reinforce, modernise, and future ...

Explore our full range of clean energy solutions -- solar PV systems, EV chargers, heat pumps, and smart energy management for home or business.

BNRG is a Dublin-based renewable energy company that finances and builds solar farms. Unlike other energy companies, BNRG is involved in the entire lifecycle of its energy projects ...

Citizens are at the forefront of Ireland's transition to clean energy, but the shift away from fossil fuels will not happen unless their energy bills drop and homes are warmer, Minister for...

Ireland has several renewable energy support schemes designed to encourage the development and adoption of clean energy sources such as wind and solar. Support schemes help ...

Electricity accounted for just over 22% of Ireland's energy demand in 2023, with just over 40% of that electricity coming from renewable sources. Renewable electricity is by far the largest ...

The "Monthly Recurring Charge" is a fee that the provider will add to each of your bills in addition to the electricity/gas usage charges.

One way to do that is to share reliable and up to date information on how climate change affects us in Dublin, as well as the fastest and fairest ways to provide clean energy for the entire region.
