

The Eaton Intelligent Mobile Power Distribution System transforms generators into a fuel-reducing demand-managed microgrid by applying proven technology that enhances fuel savings, reliability ...

The size of the clean energy microgrid system deployed by Eaton and Enel North America is a first in Puerto Rico, substantially reducing the facility's carbon footprint, boosting energy ...

With its microgrid control solution and grid-interactive xStorage battery energy storage system (BESS), Eaton will help the library maximize onsite solar consumption and export excess ...

By generating and storing clean energy independently from the external power grid, the system substantially reduces the facility's carbon footprint, boosts energy resilience and strengthens ...

We can help you build a more resilient, efficient and sustainable energy infrastructure by developing a microgrid system suited to your specific needs. We also offer microgrid project financing for an end-to ...

With the ability to isolate from the primary electric grid, Eaton's microgrids provide load control and optimize energy usage. Eaton's turnkey services help customers develop and achieve a reliable ...

The company was recognized for helping develop Puerto Rico's largest clean energy microgrid at its manufacturing plant in Arecibo, substantially reducing the facility's carbon footprint, ...

In April 2024, Eaton partnered with Enel to implement Puerto Rico's largest clean energy microgrid at its Arecibo circuit breaker plant. The system integrates 5 MW solar capacity, 1.1 MW battery storage, ...

The project will help reduce the facility's carbon footprint, boosting energy resilience and bolstering community infrastructure. Eaton has also implemented efficiency measures using its intelligent power ...

The microgrid system of 5-megawatt solar photovoltaic (PV) arrays, approximately 1.1 MW of battery storage, and existing on-site generators support more than half of the facility's energy needs. The ...
