

Red Willow Solar, a wholly owned subsidiary of Westbridge Renewable Energy, has received power plant and battery energy storage system (BESS) approval from the Alberta Utilities ...

The U.S. Bureau of Land Management has approved changes to the 700 MW solar, 700 MW 2,800 MWh energy storage Libra Solar Project in Nevada, marking the first time it has advanced ...

The project includes a 1,150-megawatt (MW) solar facility with approximately 3.1 million panels and up to 1,150 MW (4,600 megawatt-hours) of battery storage - enough to power 850,000 ...

Officials as part of their June 11 announcement about the project said the facility once complete will be the largest battery energy storage system in the world.

Together, solar and battery storage account for 81% of the expected total capacity additions, with solar making up over 50% of the increase. Solar. In 2024, generators added a record ...

Whether you're a solar developer eyeing battery additions or a manufacturer building standalone storage, this guide will help you navigate the paperwork jungle like a machete-wielding ...

"California is moving faster than ever before to build the clean energy we need - now with the world's largest solar and battery project," said Governor Gavin Newsom.

Shanghai has approved the Fengxian 1# offshore photovoltaic project, the first commercial-scale solar-wind hybrid of its kind in China. The move marks a major step forward in the ...

Summary: Navigating energy storage project approval systems has become critical for renewable energy adoption. This guide explores approval processes across industries, shares success ...

Dominion is now seeking approval for 11 solar and battery projects as part of its race to meet those goals. "It is the largest amount of solar and energy storage requests that we have made ...
