

Spain has established itself as a solar powerhouse in Europe, but a quiet bottleneck threatens the momentum: energy storage. In 2024 alone, the country experienced more than 1,100 ...

Energy storage has become a key piece of the electrical future in Spain, amidst the advance of renewable energies and the progressive withdrawal of nuclear generation.

Spain's battery energy storage market is at a critical point. Despite being a leader in renewable energy deployment in Europe, the country has only 18 MW of standalone batteries installed, which is 300 ...

Listed below are the five largest energy storage projects by capacity in Spain, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a ...

The European Commission on Monday approved a new aid scheme for the deployment of large-scale electricity storage in Spain. Subsidies will be available for standalone energy storage ...

Spain's battery storage program expanded to EUR840M, funding 143 projects totaling 8.9GWh. Learn how this initiative creates opportunities for solar-storage hybrids and boosts grid ...

Spain's Instituto para la Diversificaci&#243;n y Ahorro de la Energ&#237;a (IDAE) has issued a provisional funding proposal for the country's first call for innovative energy storage projects,...

Find out all about how Iberdrola Espa&#241;a is revolutionising energy storage with advanced solutions for a future of sustainable energy in Spain.

Spain authorizes more than 3,400 MW in energy storage, marking a rebound after the blackout and consolidating solar and battery hybridization. Energy storage has experienced an ...

Spain has launched an ambitious EUR700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It includes ...
