

Explore the official locations of Solar Fiji across the country. This map highlights our key service and operations centers in Suva, Nadi, and other major regions.

The Feiji Off-Grid Microgrid Project has been successfully completed, not only providing stable power to enterprises but also serving as an innovative case study integrating PV, ESS and ...

Learn about our off-grid solar projects in the Pacific Islands. From Fiji to Hawaii, we deliver top-tier solar systems for remote and sustainable energy solutions.

No two communities are the same, even on the same island. Each rural community in Fiji exists in a unique physical and cultural setting with varying soil types, climate conditions, exposure to ...

With 6 percent of Fijian rural households lacking electricity, the government employs grid-extensions and off-grid solutions, including solar home systems (SHS), solar mini-grids, and micro ...

For rural areas, where grid extension is often unfeasible, off-grid solutions like solar mini-grids and micro-hydropower systems are pivotal in aligning with these national goals while delivering ...

In the world of off-grid and stand-alone power systems, "Solar Fiji" shines as the leading solar installation and solar engineering company, committed to delivering sustainable energy solutions in challenging ...

About 4% of Fiji's population lives without electricity access, representing more than 7,000 Fijian households. These Fijians dwell in more than 300 rural communities and 110 islands, far ...

Off-grid solar systems emerge as a sustainable alternative, offering a clean energy source that can significantly improve the quality of life in rural areas. The Fijian government ...

The Off Grid PV Power Systems: System Design Guidelines for the Pacific Islands provides an overview of the technical requirements for the design of the off-grid (photovoltaic) power systems.
