

Built with durable materials, the cabinet ensures long-lasting performance and reliable power delivery. As industries adopt more sophisticated energy solutions, inverter control cabinets from ...

With the frequency technology become more and more mature, the use of frequency inverter, PLC, digital-analog conversion module, temperature sensor, temperature module and other devices ...

The fire pump control cabinet consists of a pump assembly with 2 electric pumps, 1 pressure compensation pump and 1 diesel pump, operating under pressure switches for control applications ...

LSK series automatic control cabinet is composed of automatic ...

Equipped with dual fire suppression systems and an IP54 rating, it ensures safe operation in complex outdoor environments. Supports real-time status monitoring and remote management via mobile app ...

Our inverters for control cabinet installation have a power range from 0.33 to 215 HP and can be customized with optional plug-in modules. Variable cooling solutions ensure optimum heat dissipation.

It houses a programmable logic controller (PLC) and a frequency inverter (VFD) within a single cabinet, making it convenient to control motor speed, direction, and logic sequence. It is constructed with ...

Find out how our in-cabinet automatic Stat-X fire suppression is ideal for individual electric cabinets, control panels, and/or cable trays.

It is a professional manufacturer that develops, produces, and sells various power cabinets, wind power control cabinets, photovoltaic inverter chassis consoles, cabinets, chassis, network cabinets, server ...

LSK series automatic control cabinet is composed of automatic control part, peripheral operation execution mechanism, motor comprehensive protection part and all kinds of sensor devices.

Protect electrical cabinets with direct low pressure fire suppression system featuring tube based detection, clean agent technology and instant fire control.
