

Solar power works by converting energy from the sun into power. There are two forms of energy generated from the sun for our use - electricity and heat. Both are generated through the use of solar panels, which range in ...

Hanergy is a thin-film solar power company from China that was established in 2009. It was selected as one of the 50 smartest companies in the world back in 2014, after establishing itself as a ...

Using state of the art proprietary photovoltaic modules, we generate clean, high quality energy, offering our customers the ability to start benefiting from clean renewable energy without any upfront cost.

Hanergy Thin Film Power Group globally introduced its innovative BIPV product - HanWall, the world's first integrated solar powered wall solution, on 29 September, at launch ...

Through global technical integration and independent innovation, Hanergy has become a world leader in thin-film solar technology.

Hanergy's solar power generation installation solutions are redefining renewable energy with flexible thin-film technology that's turning roofs into power plants - sometimes so sleek you might mistake them for ...

Hanergy America Solar Solutions sells solar modules and applications products, and develops solar projects throughout the Americas. Using state of the art proprietary photovoltaic modules, we generate clean, high ...

Hanergy manufactures high efficiency thin film solar modules. Almost 95% of the production materials are manufactured internally and supplied for solar module manufacture.

With efficiency of greater than 15%, the panel exceeds silicon performance with low temperature coefficient. In addition, the panel is designed with low system cost in mind.
