

A module hoist, also known as a PV panel hoist or material hoist, is a mechanical device designed to lift and transport PV panels to elevated areas like roofs or scaffolding.

The 3S LIFT Ladder Hoist System is a portable solution for lifting heavy & oversized materials, like CMU/Ballast Block and Solar Panels/Modules, vertically to the rooftop hands-free.

At The Hoist People, we supply a range of hoists including Becker ladder hoists and GEDALIFT ladder hoists, both of which are ideal for solar applications.

The ultimate solar panel lifting device for faster, safer installations. Trusted worldwide, designed by Solar Panel Lifter.

It takes less than 30 seconds to safely and easily lift solar panels and equipment to a two-story roof. At the end of the day simply tuck your lift into a regular work van, or even a car, where it is ready to set ...

Platform Hoists are perfect for residential and small-scale commercial solar installations. These ladder-style hoists allow you to easily lift solar panels, racking systems, and installation tools directly to the ...

Specially designed with a custom carrier that functions as a cargo receptacle, GEDA's solar panel lift is a space-saving way to reach inaccessible loading areas.

The TranzVolt is a battery powered, solar panel hoist, which allows for the vertical lift of modules to the rooftop. This is an excellent option for projects located in remote, off grid, or new construction areas ...

The Solmetric Module Lift is designed to safely and quickly transport a PV module to a roof. The device uses your existing fiberglass Werner or Louisville extension ladder.

The Fluke Module Lift(TM) is designed to safely and quickly transport a PV module to a roof, streamlining the installation process of solar panels. This innovative tool enables you to lift solar modules to the ...
