What is solar panel capacity?

Solar panel capacity refers to the amount of power a solar panel can generate under standard test conditions. It is measured in watts (W) and directly affects how much electricity your solar power system can produce. The higher the capacity, the more power you get.

How do you calculate solar panel capacity?

More sunlight means higher energy generation. To calculate the total solar panel capacity needed, use this formula: $\text{Total Solar Panel Capacity (kW)} = \text{Daily Energy Consumption (kWh)} / \text{Peak Sun Hours}$ For example, if your home consumes 900 kWh per month (30 kWh per day) and you receive 5 hours of peak sunlight per day:
