

Ireland's new energy solar power generation and energy storage equipment

With a strong pipeline of further energy storage projects, Ireland's electricity system is becoming more flexible and agile facilitating the greater integration of cheaper renewable wind and ...

This report, published jointly by Energy Storage Ireland and the Irish Wind Energy Association, shows how a strong electricity grid and new low-carbon technologies are essential to achieving the 70 per ...

Highfield Energy has been one of the most active in Ireland, when incorporating energy storage alongside solar farms, with at least 15 applications submitted with this pairing.

News from the photovoltaic and storage industry: market trends, technological advancements, expert commentary, and more.

With the possibility of more sunshine and longer days, Ireland could easily break even more records, further solidifying its position in the renewable energy landscape. March also saw a significant ...

Solar Ireland has launched the Scale of Solar in Ireland 2025 Report to mark European Solar Day, capturing the latest trends, milestones and insights on how solar is powering Ireland's ...

This is increasingly important as data centres grow and seek to run on renewable energy, requiring storage to bridge periods of low wind or solar generation. FAQs: Energy storage systems in ...

As Ireland moves towards a net-zero energy system where home-grown renewables are the main source of electricity, solar power is becoming an increasingly important part of our national ...

In June 2023, the Irish Solar Energy Association published its Scale of Solar report, aimed at highlighting the significant growth of solar PV in 2022 to 2023. Most notably, RESS 1, the ...

Investment in Ireland - In February 2025, Bord Gás Energy announced an investment of EUR1 billion between 2024 and 2029 in Ireland's energy infrastructure and to support the green ...
