

We deliver state-of-the-art Microgrid and Smart Grid solutions that put control back in your hands, ensuring energy security, operational continuity, and long-term cost savings.

A recent report by EY highlights how the region's energy infrastructure faces heightened cyber, environmental and geopolitical risks -- and how resilience frameworks, including digital and ...

Kuwait is negotiating a major battery storage project with a discharge capacity of up to 1.5 gigawatts and total energy storage of between 4 and 6 gigawatt-hours, in a bid to ease chronic...

The Gulf nation seeks a large-scale battery storage solution with up to 1.5 gigawatts discharge capacity and 4-6 gigawatt-hours energy storage to address ongoing electricity shortages.

In a bid to tackle mounting power shortages and ensure energy reliability, Kuwait is advancing plans to build one of the Middle East's largest battery energy storage systems, with a ...

The energy storage market for microgrids is experiencing robust growth, driven by increasing demand for reliable and resilient power solutions, particularly in remote areas and regions with ...

Here's a deep dive into the current state, future potential, and why Kuwait's energy storage market is a game-changer for the Middle East.

Kuwait is taking a significant step forward in its energy strategy, planning to develop one of the Middle East's largest battery storage projects.

Microgrids | Grid Modernization | NRELA microgrid is a group of interconnected loads and distributed energy resources that acts as a single controllable entity with respect to the grid.
