

A solar power plant, floating 22,370 miles (36,000 km) above Earth, might seem like science fiction. Yet, China is actively working to bring this project to life, which could transform our...

Longroad Energy has signed a long-term Power Purchase Agreement (PPA) with Meta for the entire output of its 300 MWac 1000 Mile solar project in Yoakum County, Texas. The energy ...

US renewables developer Longroad Energy has reached financial close for its 400MW 1000 Mile solar project in Texas. Under a deal signed last year between Longroad and Meta, the ...

Longroad has successfully developed six wind and solar projects in Texas, but 1000 Mile is the first project that Longroad has developed within Texas's SPP footprint. The project is expected ...

In an exciting development for the renewable energy sector, Longroad Energy has announced a significant partnership with Meta to launch a 300 MW solar project known as the 1000 ...

Longroad Energy, a U.S.-based renewable energy developer, is advancing the 1000 Mile Solar project, a 400 MWdc (300 MWac) facility in Yoakum County, Texas. The project operates ...

Picture this: 2.8 million solar panels stretching across desert terrain like a giant metallic crop, quietly converting sunlight into enough electricity to power 460,000 homes. That's the Long Solar Power ...

In late 2024 Longroad finalized a long-term offtake agreement with Meta in the form of an Environmental Attributes Purchase Agreement, which includes a financial settlement arrangement for the entire ...

With commercial operations expected by 2026, the project represents Longroad Energy's advancement within the Texas SPP region. Longroad Energy and Meta have signed a long-term ...

Miles-long rows of solar panels humming under the desert sun, powering whole regions. This list cuts through the noise, ambitious announcements, and glaring projections.
