

How big is the solar microinverter market in 2025?

The solar microinverter market is valued at USD 5 billion in 2025 and is projected to reach USD 26.77 billion by 2035, expanding at a CAGR of 18.3%. The string inverter segment is anticipated to grow fastest among product types, with a CAGR of 5.7%.

How is the solar PV inverters market segmented?

The solar PV inverters market is segmented by inverter type, application, and geography. By inverter type, the market is segmented into central inverters, string inverters, and micro-inverters. By application, the market is segmented into residential, commercial and industrial, and utility-scale.

How is the global solar microinverter market segmented based on connectivity?

Based on the connectivity, the global solar microinverter market can be segmented into standalone and on-grid. Currently, standalone holds the majority of the total market share. 6. What is the breakup of the global solar microinverter market based on the component?

What is the global solar PV inverters market size?
