

French renewable energy company Qair has signed a new loan to support the implementation of a hybrid solar photovoltaic and battery energy storage system (BESS) project in Mauritius.

Mauritius' energy storage photovoltaic projects present \$240 million in immediate opportunities. With technical complexity increasing, strategic partnerships and localized solutions will determine bidding ...

Switzerland's new EUR2 billion energy storage initiative isn't just another infrastructure project - it's a moonshot combining hydropower tradition with cutting-edge tech.

Qair International, a prominent French independent renewable energy producer, has successfully closed the financing for its 60 MWp hybrid solar and storage project in Mauritius.

Renewable energy developer Qair has secured financing from SBM Bank (Mauritius) Ltd for its StorSun I and II hybrid solar-plus-storage projects. These two projects are part of a larger 60 ...

The Government of Mauritius has inaugurated a 20 MW grid-scale battery energy storage system (BESS) at the Amaury Sub-station, marking a significant stride towards its ambitious goal of ...

The containerized mobile foldable solar panel is an innovative solar power generation device that combines the portability of containers with the renewable energy characteristics of solar panels.

Qair has announced the closing of a new loan to support the implementation of a hybrid solar photovoltaic and battery energy storage system project in Mauritius.

The government of Mauritius has inaugurated a 20 MW grid scale battery energy storage system from Siemens to help meet its goals of 60% renewable energy by 2030.
