

Measures to promote wind power and photovoltaic power generation

Total global renewable power generation capacity - a key energy transition driver on the supply side - will need to more than triple from the 2022 level under the 1.5 °C Scenario, with solar PV and wind ...

Our power and renewable energy research will help you improve your power generation strategy with predictive fuel and emissions prices and market swings.

This report presents a first-ever comprehensive stocktake of integration measures implemented across 50 power systems worldwide, covering nearly 90% of global solar PV and wind generation.

Development on public lands and waters, where there are significant wind and solar energy resources, may help us achieve our climate goals.

Taken together, these efforts illustrate the Biden Administration's multipronged approach to incentivizing solar energy generation and other renewable energy sources in the United States.

Research, investment, and policy pivotal for future energy demands. The review comprehensively examines hybrid renewable energy systems that combine solar and wind energy ...

Here we present a strategy involving construction of 22,821 photovoltaic, onshore-wind, and offshore-wind plants in 192 countries worldwide to minimize the levelized cost of electricity.

This report calls for strategic government action, enhanced infrastructure, and regulatory reforms to ensure the successful large-scale ...

This report calls for strategic government action, enhanced infrastructure, and regulatory reforms to ensure the successful large-scale integration of solar PV and wind in order to meet global ...

In this context, policies and regulatory frameworks can lower investment risks, promote the deployment of renewable energy generation technologies and help better correlate renewable energy potential ...

There is a patchwork of federal, state, and local policies and regulations pertaining to renewable energy systems that impact your project development. It is important to understand the ...
