

Thanks to the country's geographical conditions, Mexico has great potential for solar and wind energy, which makes it an ideal candidate for the implementation of energy storage systems to ...

Mexico is experiencing a rapid acceleration in large-scale solar and energy-storage proposals, following the government's rollout of a new decree in mid-October that more tightly ...

The facility will be located in Juarez in the state of Chihuahua. In October, Spanish energy company Iberdrola announced plans to move ahead with two solar projects totaling 535 MW ...

By combining specific regulations, a storage mandate for new renewable projects, and long-term planning, Mexico is emerging - according to OLADE - as a regional benchmark for energy ...

Phase III of the project will add 300 MW of solar PV capacity and 90 MW of battery energy storage with a three-hour duration, with an estimated investment of MXN 6.49 billion. ...

This initiative combines cutting-edge battery storage solutions with renewable energy integration to address grid stability challenges. Let's explore how this project is reshaping Mexico's clean energy ...

Mexico is seeing a surge of large-scale solar and battery storage proposals across multiple states following an October decree that sets clearer rules for private energy investments.

Mexico's energy sector stands at a critical crossroads. While the country boasts immense potential in solar and wind resources, the path to a sustainable and secure energy future is still hampered by a ...

On February 17th, 2023 (February 16th, Beijing time), the construction of the first phase of the 120 MW Peñasco Port solar power project in Mexico was completed by the Federal Electricity ...
