

Modular power storage cabinets for substations

Customizable unit substations with primary voltage classes up to 38kV and secondary voltage class starting 5kV and below. Utilize Schneider Electric's wide range of choices on all parts of each ...

E-Houses are customized, prefabricated substation (pre-assembled, pre-tested) modular power substations. Providing electrical power - to wherever it's needed.

The modules contain all components for a complete substation, from the power transformer and AIS or GIS switchgear to medium- and high-voltage cables, protection, monitoring and control systems, and ...

From utility providers to industrial operations, our modular substation buildings deliver fast, turnkey solutions for electrical substation construction projects nationwide.

This design method concentrates key substation functions such as high-voltage (HV) switches, transformers, protection, and metering into a single modular unit that is easy to transport and can be ...

Take a virtual tour inside an actual modular integrated transportable substation. Each component's doors are open and includes pop-up information so you can learn more

ABB eHouses are prefabricated transportable substations, designed to house medium voltage and low voltage switchgear, critical power equipment and automation cabinets. An eHouse solution is a cost ...

Brunstock is proud to offer modular substations that are no bigger than a standard shipping container. Whether you need a secondary collector station (MV switchgear kiosk) or a primary switchgear ...

Our modular substations from Elgin Power Solutions provide fast deployment and flexible configurations for temporary, mobile, or grid-connected power applications.

Explore our fully integrated modular power substations with the USP& E Powerbox. These containerized units offer modular power plant capabilities for large industrial projects.
