

Our priority is to deliver top-quality installations without unnecessary setbacks, whether that means using REC, Qcells, or trusted alternative panels. If you have a project in progress with us, ...

Contact the manufacturer of your solar panels or system components for warranty support. Seek alternative local contractors who might take over service agreements.

Right now, U.S. manufacturers do not produce enough solar panels to meet the nation's demand, but industry investments and federal tax incentives have been making progress, though ...

A decade ago, someone knocking on your door to sell you solar panels would have been selling you solar panels. Now, they are probably selling you a financial product--likely a lease or a...

But don't break out the champagne yet. With silicon prices swinging like a pendulum (\$30k/ton to \$10k and back), manufacturers walk a profitability tightrope. As one CFO confessed, "We're not making ...

As of mid-August, in addition to the historic rush to go solar before tax credits expire, we've seen two major updates on the solar panel equipment supply from leading manufacturers.

Trade and supply-chain frictions have resulted in an acute shortage of solar photovoltaic (PV) equipment in the United States that risks abruptly slowing the rate of solar PV installation.

Solar panel supply is no issue, but other installation bottlenecks have emerged, said a report from Clean Energy Associates.

After several years of 30 percent annual growth in installations, 2024 saw a decline: fewer panels were installed in many markets, and companies' valuations declined. This led to large capital ...

Enphase Energy (NASDAQ: ENPH), a prominent provider of residential solar energy solutions, has experienced a significant decline in its stock, falling nearly 40% this year and over 70% ...
