

It is recommended for AP outdoor installation to protect the AP as well as the indoor equipment electrical surges. Surges that can reach the internal equipment from the outside, or least common, surges that ...

The AP 13 features integrated antennas, while the AP 13E supports external directional or omnidirectional antennas for more flexible coverage. Both models support up to 96 active users and ...

Determine preliminary access point (AP) locations. These locations include the power and wired network access, cell coverage and overlap, channel selection, and mounting locations and ...

Pharos Base Stations works seamlessly with TP-LINK dish and sector antennas to provide efficient PtP and PtMP data transmission. Pharos Base Stations also feature a built-in mount, ...

If the Meraki Outdoor is installed and exposed to the elements, it should be properly grounded to prevent damage to the AP, connected networking equipment, and the mounting structure.

When deploying outdoor wireless networks, many IT teams instinctively assume that cranking up an access point's (AP) transmit power guarantees wider coverage.

A compact outdoor Wi-Fi 6 CPE with a powerful 16 dBi antenna, AP mode, and multiple mounting options - perfect for masts, poles, or rooftop deployments.

My building has nearly 2 foot thick walls (Built in 1909) and securing strong reliable WiFi to my Arlo cameras from an indoor base station is more than just a little challenging?

Since many of the future applications will demand connectivity between outdoor base stations and indoor users, outdoor to indoor (O2I) penetration is one of the most important factors affecting the ...

AP failures due to water penetration via the Ethernet port are caused by improper AP orientation, a missing or improperly installed grommet, or the lack of a drip loop. As such, these types of failures ...
