

Solar energy adoption in Uzbekistan is not uniformly distributed across all regions, with certain areas demonstrating higher rates of installation. The Tashkent region leads the way, accounting for 35% of ...

Recent data shows the country has successfully installed approximately 1,857 megawatts (MW) of solar power, a testament to its aggressive push towards renewable energy and a crucial ...

Uzbekistan has made a positive effort toward that end, including by setting clear targets and reforming the energy sector and has been progressing toward achieving the solar power capacity target of 4 ...

Recently, the 500MW photovoltaic project in Jizak, Uzbekistan, which was jointly constructed by China Construction Fifth Engineering Bureau, has successfully achieved full capacity ...

OverviewPhotovoltaicsGovernment PoliciesPotentialResearch and developmentIn addition to mega-scale solar projects, small- to medium-scale solar projects including rooftop solar PV become attractive to developers and consumers thanks to appropriate policy targets and measures. Off-grid solar energy systems could secure clean energy supply in remote areas with good solar resources but no access to the grid.

Tashkent, Uzbekistan (UzDaily ) -- As of December 1, 2025, solar panels with a total capacity of 1,971 MW have been installed in Uzbekistan at 141,221 facilities throughout the republic. ...

Between January and July 2025, solar panels installed on homes, businesses and infrastructure sites across Uzbekistan generated 875 mln kWh of electricity, according to the Ministry ...

Uzbekistan is a promising country among CIS states for solar energy projects due to its excellent solar irradiation potential.Early in 2017, the government announced clean energy targets for 450 MW of ...

Since May 1 2023, newly commissioned multi-story buildings in Uzbekistan are already required to have solar panels installed on at least 50% of their available rooftop space. Shavkat ...

As of December 1, 2025, Uzbekistan has installed small-power solar panels with a total capacity of 1,971 MW across 141,221 facilities nationwide, marking a step in the country's transition to renewable ...

The government of Uzbekistan has implemented several initiatives to promote the use of solar power, including the development of large-scale solar power plants and the introduction of incentives for ...
