

Ideal for areas covered by a Wifi network or where a hardwire connection to the router is preferred, the new Solis Wifi-LAN "sticks" ensure data collection is faster and more reliable.

The WiFi / 4G stick allows Solplanet inverters to connect to the AiSWEI Cloud and App. The inverter and meter data is collected and sent to the AiSWEI Cloud via the internet to allow for easy PV plant ...

Add remote monitoring to your SunGoldPower 3000W or 5000W inverter. Easy plug-and-play WiFi module with app control. DIY install.

Efficient solar datalogging with the S3-WIFI-ST WIFI Stick. Compatible with up to 10 inverters, backed by a 2-year warranty.

USR-S100-WA12 is a Wi-Fi solar data stick launched by PUSR for data communication of photovoltaic inverters.

Online Monitoring:Online monitoring system for easy inverter status checks and performance tracking.
Wifi-Port Connectivity:Seamless monitoring with Wifi-Port, ensuring real-time data access via ...

To understand how a WiFi stick works, think of it as the bridge between your inverter and the cloud. It performs two crucial roles: data collection from the inverter, and data transmission to the monitoring ...

Online Monitoring:Online monitoring system for easy inverter status checks and ...

This product can be used in scenarios such as residential, commercial and industrial, and energy storage photovoltaic systems.

This Wi-Fi stick features a compact device, measuring a mere 51 x 112 x 27 mm, and epitomizes the "plug & play" experience. Simply insert it into our inverters, download our app, and easily connect the ...

Not only does it have that, but you can also connect with WIFI. On top of that, the customer can use it as a WIFI stick during normal operations and when the WIFI goes down the datalogger will ...
