

What size solar ballast block do I Need?

The solution? 4" x 8" x 16" Solar Ballast Block - 30 Piece units. These durable, easy-to-install blocks are designed specifically to keep solar arrays firmly in place, providing a strong foundation that doesn't require roof penetration.

Why should you choose solid solar panel ballast blocks?

This is especially important for flat or low-pitched roofs where penetrations can compromise drainage and increase the risk of water pooling. When working on a commercial or residential solar project, contractors need materials that are built to last. 4 x 8 x 16 Solid Solar Panel Ballast Blocks conforms to ASTM C90 and ASTM C1491 standards.

How many solar ballast blocks are in a pallet?

Efficiency is key when it comes to large commercial projects. That's why each pallet contains 30 units of 4" x 8" x 16" Solar Ballast Blocks, specifically designed to optimize point loading. By keeping the pallet weight under 1,000 lbs, these blocks meet commercial roof load limits, reducing the risk of structural strain.

Are mm concrete solar ballast blocks a good choice?

For contractors, managing project costs is always a top priority. MM Concrete's Solar Ballast Blocks are not only durable and easy to install, but they are also maintenance-free, providing a long-term, hassle-free solution.
