

These will be Hyperion's first hybrid (solar + storage) projects and among the first of their kind to move into implementation in the Iberian Peninsula, positioning both the company and the ...

Two hybrid projects with more than 630 MWh of battery storage planned in Portugal Lightsource bp is planning an 867 MWp solar and 300 MWh battery energy storage system (BESS) ...

Portugal's energy-storage market is entering a new stage of maturity, combining grid-scale standalone batteries and hybrid (co-located) systems with renewable plants.

Portugal's battery storage boom steadies prices, slashes blackouts and opens tech roles. Discover how new policies could reshape your power bill.

Portugal will invest \$480 M (EUR400 M) to strengthen grid stability and scale battery storage, aiming for 750 MW of BESS capacity after Iberian blackout.

The Portuguese government has initiated a public consultation for a hybrid project that includes a 339.4-MWp solar plant, a 14.4-MW wind farm, and a 310-MW/620-MWh battery energy ...

Hyperion Renewables, a company with nearly two decades of experience in the development, financing, and operation of large-scale renewable projects, has begun construction of ...

Portugal's heavy reliance on renewables, particularly solar and wind, makes BESS essential for a stable energy supply. These systems act as a critical buffer, providing backup power ...

Hyperion Renewables, in partnership with Omexom Portugal and advanced battery manufacturer Saft, has begun construction of Portugal's first utility-scale battery energy storage ...

This level of performance underlines both the opportunities and the challenges ahead: while renewables now dominate the energy mix, ensuring that the system remains stable and secure ...
