

Recent Status of Photovoltaic Solar Panel Factory

Top news on major suppliers of photovoltaic inverters, solar panels, PV modules, batteries and other solar equipment and products. Get insights into solar system pricing and recent manufacturing projects.

First Solar (Nasdaq: FSLR) announced in its Q3 2025 earnings report that it will open a new 3.7 GW annual capacity solar module finishing line in the United States.

The US might be making more solar panels, but the rate at which people are installing them has slowed recently.

Since Biden enacted the IRA, solar companies have staked over \$34 billion for US factories, according to the Solar Energy Industries Association, with over 39,000 new factory jobs ...

US solar manufacturing ramped up sharply in the first quarter of 2025, supporting record levels of new capacity as solar and storage made up 82% of additions to the grid.

This map provides information about all of the solar photovoltaic (PV) manufacturing facilities in the United States and how they contribute to the solar supply chain.

As a testament to the effectiveness of American energy incentives, domestic solar module manufacturing capacity has nearly quintupled since 2022 -- courtesy of new or expanded ...

The current US solar manufacturing ecosystem represents a comprehensive network of production capabilities that extends far beyond simple panel assembly, with domestic module ...

China dominates global solar supply and most U.S. developers source low cost solar panels from Southeast Asia, where many Chinese companies have shifted operations to bypass U.S. ...

Panasonic announces its exit from the factory, ceasing its solar panel production. To fill the factory and meet job targets, Tesla adds new, non-solar product lines.
