

Rooftop solar panels were overturned in winter

Moe and her wife, Jackie DeCarlo, had been waiting to install solar panels for years, but things kept getting in the way -- their roof was too old, and then they had to wait to have it...

California's rooftop solar policy is under renewed scrutiny. In August 2025, the California Supreme Court ordered a lower court to re-examine the state's controversial "NEM 3.0" rules, which ...

A case study analysis by Norway's Over Easy Solar has found that vertical rooftop solar panels outperform conventional rooftop PV systems during snowy months. Energy yield was up to ...

Rooftop solar is talking its lumps in California as the state juggles its regulations to make it less attractive to homeowners.

This year, during the heat of summer, when temperatures in New York surpassed 90°F, the 22 solar panels on the roof of my house were doing absolutely nothing.

One solar expert used real-world data to debunk this pervasive myth about solar panels not working in winter.

Newsom's appointees were persuaded by the monopoly utility companies -- and several other groups, as I'll discuss shortly -- that the costs of the solar program were fueling higher energy ...

The expansion of rooftop solar in New England is keeping the lights on during winter, surprising the region's grid operator and challenging long-standing assumptions that the growth of ...

Turns out solar companies were right. The CPUC revamped California's rooftop solar regulations, reducing payments to homeowners for excess battery stored power. After the fact. After ...

The California Public Utilities Commission failed to abide by state law when it slashed financial incentives for residential rooftop solar panels in 2022, environmental groups argued before...

Rooftop solar panels were overturned in winter
