

Sichuan-Chongqing New Energy Storage Industrial Park

To systematically evaluate the hydrogen energy industry development potential in Sichuan and Chongqing and formulate differentiated development strategies, this study employs field surveys and ...

Plans include laying out a number of LNG and CNG receiving stations, as well as collaboratively establishing a 10-billion-level natural gas storage and peak-shaving base in the ...

The Sichuan-Chongqing region, as the core of western economy, has abundant energy resources, strong power demand, and significant grid peak-shaving pressure, creating vast market ...

At present, Sichuan and Chongqing have completed the layout of the entire hydrogen industrial chain, which has gathered more than 200 enterprises and research institutes engaged in the production, ...

At this Western Fair, the Sichuan-Chongqing Cooperation New Energy Industrial Park project with a total investment of 20 billion yuan was signed and landed in Rongchang District, ...

On February 26, the reporter learned from the Chongqing New Energy Storage Materials and Equipment Research Institute that the institute has developed industrial-grade magnesium-based solid-state ...

A 10-square-kilometer new energy storage industrial park is taking shape. Once fully operational, it can produce 56 GWh of lithium batteries and 22 GWh of energy storage modules ...

On December 22, the Ruihe Energy Storage Project Base was completed and the launching ceremony of the industrial alliance was held in the Western Science City Chongqing High-tech Zone.

After completion, it will become an integrated emergency peak-shaving base for Sichuan-Chongqing energy, a vanadium battery integrated equipment production base and a national ...

We will focus on building three leading industrial clusters: intelligent connected new energy vehicles, next-generation electronic information manufacturing, and advanced materials.
