

China unveils world's first sodium-ion battery-powered EV with 248-mile range CATL says the battery delivers triple LFP power at -30°C, keeps over 90% range at -40°C, and stays stable ...

The world's first production sodium-ion EV battery emerges unscathed from extreme winter testing, delivering consistent power without the range loss

Leading global battery maker CATL and Changan Automobile unveiled the world's first passenger EV powered by a sodium-ion battery on...

For the first time, we have a battery that is cheaper, safer, and more sustainable than anything before it. If sodium-ion tech delivers on its promises, it could accelerate the world's ...

The Chinese sodium-ion battery industry is vibrant and fiercely competitive. The manufacturers listed above are leading the way in technology, capacity build-out, and market adoption.

The Changan Nevo A06 is the world's first mass-produced car powered by a sodium-ion battery. It has a CLTC range of about 250 miles and can run with little to no range loss even in -40 degrees ...

Changan Automobile officially launched its global sodium-ion battery strategy today at the "Changan SDA Intelligence Milestone Release & Sodium-Ion Battery Global Strategy Launch" event. ...

Enter Huimin Ji, a researcher at the Hunan Provincial Key Laboratory of Chemical Power Sources, College of Chemistry and Chemical Engineering, Central South University in Changsha, ...

CHANGAN Auto and CATL of China are the partners behind a new electric passenger car powered by sodium-ion batteries.

In Changsha, graduates from Central South University's leafy campus are working on sodium battery technology at nearby research laboratories run by companies including Germany's ...
