In many countries, including the United States, powered paragliding is minimally regulated and requires no license. The ability to fly both low and slow safely, the "open" feel, the minimal equipment and maintenance ...

I was always drawn to the calm and serene aerial adventure of paragliding, but couldn't enjoy it much because I wasn't close to suitable terrain. That's what got me interested in the fly-it-anywhere convenience of paramotors.

A typical paraglider engine is 20-30HP, which is 15- 20kW. Given an insolation of 1kW/m^2 , and an efficiency of 15%, you're going to need something like 100 square metres of solar cell, whereas a typical ...
