

Market forces are encouraging a people-led clean energy transformation in Pakistan from fossil fuels to solar power.

Solar power became part of the energy mix in 2013, following government policies aimed at supporting renewable energy development. The country now has seven large-scale solar projects that ...

Solar power, increasingly coupled with batteries, is a key element of the energy transition for countries including Pakistan. Pakistan is experiencing an energy revolution as households and ...

In 2025, solar power is poised to become a leading source of electricity in Pakistan, marking a significant milestone for the country's energy sector.

Pakistan isn't the first country you'd expect to crash the global solar party. But by the end of 2024, it quietly rocketed into the top tier of solar adopters, importing a jaw-dropping 22...

By embracing solar power, Pakistanis are not only saving money but also supporting the growth of renewable energy in Pakistan, paving the way for a sustainable and energy-independent ...

Solar power is booming in Pakistan. Its share of electricity generation more than tripled in just three years, climbing from four percent in 2021 to 14 percent in 2024 -- one of the highest ...

OverviewGovernment policyHistoryProjectsFarmingChallengesPublic receptionBeginning in the 1980's the first photovoltaic solar panels were installed in Pakistan in 18 different stations around the country, with a capacity of 440 kW. In 1983, a 6 kW PV system was donated by Kyocera to power the village of Kankoi, but the project was not successful. Due to a lack of expertise and maintenance, further expansion of solar projects was not pursued. In the 1990s, the first renewable energy departments were established in Pakistan, and in the early 21st century, the Alternate Energy ...

Pakistan's solar boom grows out of a decades-long power sector crisis, which has caused many Pakistanis to lose faith in the state's ability to consistently provide reliable electricity....

Pakistan, home to more than 240 million people, is experiencing one of the most rapid solar revolutions on the planet, even as it grapples with poverty and economic instability. The country ...

Solar power in Pakistan presents a more reliable and cheaper energy source for millions of people in the country. It has become easy for any household or business to install solar panels. ...
