

Since 2016, DAS Energy has been developing and producing innovative solar panels, designed specifically for installation on roofs with limited load-bearing capacity.

To make the shift away from fossil fuels, we need to place a greater focus on innovative solutions such as green roofs with integrated solar PV and/or solar thermal systems and facades with integrated ...

Austria's new government has promised a 1 million photovoltaic roofing program as part of its plan to achieve climate neutrality by 2040. The country pledged to source all its electricity ...

We at Over Easy Solar are proud to announce the successful installation of our vertical bifacial solar panels in Austria, marking a significant milestone for our company.

This article breaks down the benefits, challenges, and real-world applications of photovoltaic (PV) panel installations in Austria's capital, backed by data and actionable insights for homeowners and ...

The project, estimated to cost around EUR50 million, is scheduled to begin construction in 2028. In addition to generating renewable energy, the new roof will provide passengers with ...

As the system extends over several of the factory's roofs, various solar mounting systems and solutions from Schletter were used. The modules were mounted on the flat roof ...

The carport's entire 642 square meters of roofing is covered with photovoltaic panels. That's around 270 modules, each of which delivers up to 405 watts of electricity at peak sunshine.

Austrian solar manufacturer Sonnenkraft has debuted its new "Terracotta" solar panel that matches red-tiled roofs and is historic-building compliant.

Austria aims to achieve a 100% renewable electricity production by 2030 with 1,000,000 homes having solar panels fitted by that date. 11 TWh of extra photovoltaics will be needed above 2021 levels.
