

From Space to Earth tracks the evolution of the technology of photovoltaics, the use of solar cells to convert the sun's energy into electricity.

- In May 2024, solar accounted for 8.7% of all U.S. electricity production, and from March through October 2024, solar accounted for more than 7.5% of all U.S. electricity ...

WORLDMETRICS REPORT 2026 Solar Power Industry Statistics The solar power industry is experiencing rapid growth in capacity, value, and employment worldwide.

- In May 2024, solar accounted for 8.7% of all U.S. electricity production, and from March through October 2024, solar accounted for more than 7.5% of all U.S. electricity production.

About 70% of the world's solar panels are manufactured in China, and around 10-15% of the reserve is accommodated by Chinese companies working in Southeast Asia. In February, solar ...

Global Market Outlook for Solar Power 2025-2029 provides an in-depth forecast and analysis of the global solar power sector, with a special focus on India's rapid growth and emerging ...

Expert industry market research on the Solar Power in the US (2015-2030). Make better business decisions, faster with IBISWorld's industry market research reports, statistics, analysis, data, trends ...

In the months following the passage of the One Big Beautiful Bill Act (OBBBA), the solar industry has been adapting to new and not fully settled policy. Several uncertainties still hang over ...

Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the solar industry.

The solar industry is not just about clean energy - it is an economic powerhouse that drives investment, job creation, and technological innovation across the U.S.

Almost 70 gigawatts (GW) of new solar generating capacity projects are scheduled to come online in 2026 and 2027, which represents a 49% increase in U.S. solar operating capacity ...
