

This new, large-scale solar database contains all ground-mounted commercial U.S. solar photovoltaic facilities with capacities of one megawatt or greater.

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

Most are individual photovoltaic power stations, but some are groups of co-located plants owned by different independent power producers and with separate transformer connections to the grid.

Silicon Ranch and Meta are bringing a new 100-megawatt solar power plant to South Carolina, along with a land stewardship plan.

Most are individual photovoltaic power stations, but some are groups ...

TechCentral conducted desktop research into the largest, utility-scale solar power projects that feed energy into South Africa's grid as part of government's renewable IPP programme.

This map displays information on location, fuel type, electric generation, generating capacity, ownership, and emissions for over 10,000 power plants across the country.

Interactive U.S. Solar Farms & Solar Parks Map showing plant boundaries, owners, nameplate capacity (MW), and power output. Based on EIA-860/860M/923. Filter by utility-scale photovoltaic and CSP ...

Berkeley Lab collects, cleans, and publishes project-level data on distributed* solar and distributed solar+storage systems in the United States. The data are compiled from a variety of sources, ...

The U.S. Solar Photovoltaic Database (USPVDB) provides the locations and array boundaries of U.S. front-of-the-meter, photovoltaic facilities, direct current capacity of 1 megawatt or more, that became ...

To provide a normalized comparison among hundreds of different utilities in the Southeast, SACE has ranked utilities on the basis of solar watts per customer (W/C). This illustrates the amount of solar ...
