

Chile has reached fresh milestones in its energy transition amid a rapid build-out of solar and battery storage infrastructure. The context: The South American nation's brisk shift to clean electricity was ...

Chile's solar boom is reshaping Latin America's energy landscape. Explore market drivers, grid challenges, storage growth, and Korkia's projects in the region.

Hybrid renewable and battery storage projects are particularly important to providing more stable and lower carbon power supply in countries such as Chile where solar is a rapidly growing energy source. ...

In March 2020 PV Magazine reported that Solarpack had begun providing power on 2 March 2020, to the Chilean grid from its 123 MW Granja project, 10 months ahead of the contracted date of 1 January 2021. With that, ...

Solar and energy storage deployment is booming in Chile, spurred on by supportive government policy that has been markedly stable for 15 years. Indeed, the nation leads Latin America in this...

The project is located in Maria Elena municipality, in the Antofagasta region in Chile. It is expected to be one of the country's largest solar and storage projects once fully operational.

In June 2014, the 100-megawatt (MW) Amanecer Solar CAP, a photovoltaic power plant located near Copiapó in the Atacama Desert was inaugurated. It was developed by the company with the same name, Amanecer Solar CAP, and was the largest in Latin America at the time. It is capable of generating 270 gigawatt-hours (GWh) of electricity per year.

Electricity generation from solar PV and wind power reached a record level in 2025, marking their highest participation to date in Chile's National Electric System.

Discover how solar and storage projects by Zelestra are shaping Chile's grid, enhancing reliability, and driving Chile's energy transition.

A major energy firm is retrofitting its existing 238 MW solar farm in Chile with a 200 MW/1,000 MWh battery storage system. This strategic move transforms the solar farm from a source of intermittent ...

The first two phases of Oasis de Atacama, the largest solar power and energy storage project in Latin America, have come on stream in Chile's Antofagasta Region.
