Designing off-grid houses in Crete by integrating energy-efficient solar panels, wind turbines, batteries and rainwater collection systems.

Broad development of solar power in Greece started in the 2000s, with installations of photovoltaic systems skyrocketing from 2009 because of the appealing feed-in tariffs introduced and the corresponding regulations for domestic applications of rooftop solar PV. However, funding the FITs created an unacceptable deficit of more than EUR500 million in the Greek "Operator of Electricity Market" RES fund. To reduce that deficit...

Various financial support programs are available, including schemes for rooftop solar panels and solar PV installations with storage, funded by the Recovery and Resilience Fund.
