

Under this framework, the HECTAPUS project focuses on exploring the possibilities of integrating Phase Change Materials (PCMs) with underground thermal energy storage and heat pump technologies together ...

Our PlusICE range of products including FlatICE, BallICE, TubeICE, Eutectic Plates and Pouches enables us to develop and apply both organic and hydrated salt based PCMs for a variety of applications around the world.

This article will introduce the top 10 energy storage companies in Sweden and explore their technological advantages and marketing strategies.

Phase Change Solutions is a global leader in temperature control and energy-efficient solutions, using phase change materials that stabilize temperatures across a wide range of applications.

Specializing in innovative energy storage systems and solar power solutions, GESS is committed to advancing the energy market with new designs and technologies. The company focuses primarily on the Swedish ...

PCMs suitable for applications in thermal storage, regulation and protection are highly crystalline, stable compounds that undergo sharp melting and freezing transitions with high heat capacity.

Through the Swedish Energy Agency's Global Innovation Accelerator (GIA) programme, Catator, a Swedish technology company specialising in hydrogen solutions, has taken decisive steps towards ...

The prominent companies driving energy storage innovation are highlighted in this article, which lists the top 10 energy storage developers in Sweden. In order to preserve energy security and integrate renewable energy ...

Our technology engages bio-based phase change materials, enabling us to craft highly efficient and eco-friendly Thermal Batteries. PhaseStor, with over 35 years of unwavering dedication, has been at the forefront of ...

This innovative thermal energy storage solution promotes environmental sustainability and is applied in various temperature control applications, including building systems, electronics, cold storage, and temperature ...
