

On February 22, the Tencent Cloud Yizheng Data Center distributed photovoltaic project was officially connected to the grid at full capacity. With a total installed capacity of 12.92 MW, this ...

Tencent Qingxin Cloud Computing Data Center Solar PV Plant is a 13.4MW solar PV power project. It is planned in Guangdong, China.

Amid the global trend towards green and low-carbon development, domestic internet giants such as Tencent, Baidu, Alibaba, JD , and Xiaomi have ventured into the photovoltaic ...

Tencent, one of China's largest technology companies, has commissioned a new microgrid at its High-Tech Cloud Data Center in Tianjin. With a total installed capacity of 10.54 MW, it is expected the ...

Solar power is difficult to harness for use directly in data centers because of fluctuations in supply, and Tencent says it has developed a three-pronged approach to mitigate potential problems.

This is the first data center microgrid project in China to adopt the "wind, solar and storage + load" intelligent management model, with an annual power generation of 14 million kWh ...

To power its operations, Tencent, an internet, cloud computing and technology company that is perhaps best known outside of China for its video games, e-commerce and social media platforms, has been ...

At the start of 2024, Tencent installed an innovative microgrid -- dubbed the "green heart" -- at our Tianjin data center. This cutting-edge system combined solar power with small-scale ...

So, in recent years, we have installed photovoltaic panels (better known as solar panels) on top of facilities across China. The result - data centers that double as power plants.
