

Joshua Rhodes, a research scientist at The University of Texas at Austin, compares energy storage batteries to Lego bricks that can be transported by truck, assembled on location and connected to ...

Because Texas runs its own electric grid through ERCOT, we can't rely on other states for backup. So when it comes to keeping the lights on here, battery storage is about as ...

Texas is already the second-highest producer of solar energy -- and one exciting new battery storage project is set to expand the Lone Star State's capabilities even further.

The Texas grid, already hosting nation-leading utility-scale wind power and a rising amount of solar capacity, also is accelerating its adoption of battery energy storage systems (BESS) ...

By uniting diverse stakeholders across the energy storage sector, LESA is working to ensure that energy storage plays a central role in enhancing grid reliability, reducing costs for Texans, and increasing ...

esVolta, LP has unveiled three new battery storage projects in Texas, set to enhance grid reliability by providing nearly 1 GWh of annual energy storage and contributing 490 MW of peak power capacity.

Canadian Solar's energy storage solutions business, e-STORAGE, and Sunraycer have announced a collaboration to supply and maintain battery energy storage projects in Franklin County, ...

Scion Energy, having its roots in South Africa, is invested in creating a sustainable platform for the rollout of more variable renewable energy in the country, with electrical energy storage being the key ...

David Lilleflore, CEO of Sunraycer, said: "Partnering with e-STORAGE on the Lupinus projects represents a significant step forward in Sunraycer's mission to advance sustainable energy ...

The projects, collectively known as the Lupinus battery energy storage projects, will total 503 megawatt-hours (MWh) and are being developed by Sunraycer, a leading clean energy ...
