

The current situation of solar power industry

About 70% of the world's solar panels are manufactured in China, and around 10-15% of the reserve is accommodated by Chinese companies working in Southeast Asia. In February, solar ...

- In May 2024, solar accounted for 8.7% of all U.S. electricity production, and from March through October 2024, solar accounted for more than 7.5% of all U.S. electricity production.

The Solar Energy Market Report 2025 provides firmographic, innovation, and investment data to outline the current state of the solar industry. It analyzes the response of solar companies to ...

We expect the combined share of generation from solar power and wind power to rise from about 18% in 2025 to about 21% in 2027. In our STEO forecast, utility-scale solar is the fastest ...

The US solar industry installed 11.7 gigawatts direct current (GWdc) of capacity in Q3 2025, a 20% increase from Q3 2024, a 49% increase from Q2 2025, and the third largest quarter for ...

When solar energy, together with wind energy, forms a high share of power generation in a grid, any excess swings in power frequency can lead to blackouts, as seen in Spain and Portugal ...

Each presentation focuses on global and U.S. supply and demand, module and system price, investment trends and business models, and updates on U.S. government programs ...

Join us at Solar Power World as we cover the world of solar news on technology, development and installation on a daily basis.

Find up-to-date statistics and facts on the global solar photovoltaic industry.

The IEA PVPS Trends in Photovoltaic Applications 2025 report provides comprehensive data and analysis on global PV deployment, technology, and market evolution from 1992 to 2024. It supports ...
