

# The first person to generate solar power in China

The series profiles the fascinating people, from ancient Greece and China to late 19th century New York to today, who have made the present day solar revolution possible.

So there is a lot of uncertainty in the Chinese solar industry, but there are also irrefutable facts: China needs to continue to expand domestic solar capacity to reach its climate target....

Energy storage plays a critical role in China's energy landscape, serving as a key enabler for the large-scale integration of renewable energy sources, such as wind and solar power, into the national grid.

When Shi Zhengrong started making solar panels at the turn of the century, there was basically no solar industry in China. But in the decades that followed, the nation started heavily...

China has unveiled the world's first dual-tower solar thermal power station in the Gobi Desert, using 27,000 mirrors to generate renewable energy round the clock, a landmark in clean ...

A large part of the solar power capacity installed in China is in the form of large PV power plants in the west of the country, an area much less populated than the eastern part but with better solar ...

Alex Shoer, of Seeder, helped to launch a business that brings solar panels to the roofs of buildings within the country. He deals with foreign businesses who, say, want to make their Beijing...

The journey began in 1958 with the development of China's first monocrystalline silicon, marking the early research phase. This progressed into solar cell development for space satellites in ...

In late-2017, China opened its 1km solar highway in the Shandong province's capital Jinan, south of Beijing. It spans 5,875 sq m and is capable of generating up to 1GWh every year - ...

In 2002, China's first domestic photovoltaic (PV) cell production line was put into operation, with 10MW of capacity. In 2004, China began exporting PV cells to Europe, taking ...
