

Can solar power plants help Ukrainian society?

"Solar power plants can help Ukrainian society," Sokolovskyi says, by giving energy independence to private citizens and businesses. Moreover, support for critical infrastructure like hospitals, clinics and schools - the kind of work Semenyshyn's Repower Ukraine does - often comes from PV and energy storage combined.

How much solar power does Ukraine have in 2024?

Figures from the Solar Energy Association of Ukraine (SEAU) earlier this year showed that the country added around 850MW of solar PV capacity in 2024, the majority of which came from self-consumption systems installed by businesses. It's "become a trend", Semenyshyn says.

Did Russia attack Ukraine's energy infrastructure in 2024?

Energy has been a major target for Russian drones and missiles throughout the war, with an intensification from the spring of 2024; at the time of writing, news broke overnight that Moscow had carried out a "massive" missile attack on Ukrainian energy infrastructure.

Why are Ukrainian businesses turning to self-consumption solar PV systems?

Following three years of bombardments and damage to its energy infrastructure, Ukrainian businesses are turning to self-consumption solar PV systems to keep the lights on.

Octopus Energy has partnered with DTEK, Ukraine's largest private energy company, to deliver solar and battery installations in Ukraine. Through their new initiative, called RISE (Resilient Independent ...

Solar power plants installed at three water and wastewater utility sites in Chortkiv, Western Ukraine, support uninterrupted water services to residents. It is the first solar energy project ...

Discover how solar energy is transforming lives in Ukraine--bringing light, safety, and hope to families surviving blackouts and war.

The changing landscape of international aid to Ukraine puts a new focus on its energy sector and the boom in self-consumption PV systems.

Discover 8 groundbreaking solar and wind energy projects shaping Ukraine's future, boosting clean energy, and leading its green transformation.

Russia continues to bomb Ukraine's fossil-fueled power plants, leaving much of the nation shivering during a brutal winter. But Ukraine's new emphasis on developing decentralized power -- ...

In 2025 Ukraine deployed around 1.5 GW of new solar capacity driven by strong interest in co-located battery energy storage systems. BasenPower breaks down the key drivers, policy ...

This report explores the current policy landscape for distributed solar PV in Ukraine and outlines three

potential policy options to accelerate the deployment of this technology. It focuses on ...

Ukraine is working toward a decentralized and climate-resilient energy system as part of its post-war recovery and long-term climate neutrality goals. This interactive map showcases the land suitability ...

**UKRAINE SOLAR ENERGY MARKET ANALYSIS** Ukraine possesses significant potential for renewable energy, particularly solar photovoltaic (PV) and wind power. Since the beginning of the ...
